

I wish I would have known this before getting to my aid station	I am glad I brought	I really enjoyed	I think we could do better next year by	General Comments
Needed a bluetooth headset; then would not have had to run antenna cable from car to pavilion	extension cords (not used) and a triple-plug extension; also my Leatherman	conversation with partner and food service guys	better maps of station areas	At Charit Creek Aid Station, Greg did an outstanding job. This allowed me to focus all of my energy into running the AS. He kept me informed about dropped runners and locations of others. Very smooth operator.. well equipped and professional.
WHAT SITE LOOKED LIKE - HOW MUCH SPACE AVAILABLE ETC.	GLOW STICKS - :) - we were not that close to where runners crossed. So I made a runway up the hill & marked the IN/OUT paths with glow sticks & reflective duct tape	ALL OF IT - I WOULD DO IT AGAIN.	MAKE SURE WE'RE ORGANIZED EARLIER ___. STREAMLINE RELAY BETWEEN RADIO NETWORKS	Wanted to thank you and your crew for coming out this past weekend. I am certain there will be ways to improve and lessons learned.
Last year's experience	Lighting, generator, heater, main radio and back up radio, ability to monitor EMA communications, bug spray, clipboard/paper/pen/pencil, watch, chairs	The AS volunteers we were with	<ul style="list-style-type: none"> •Pre-planning communications as we still had questions when we arrived at AS. •Arriving at AS prior to AS volunteers to set up to have a better spot for communications. •Sign at bottom of Duncan Hollow stating non-event related vehicles prohibited with dates and times of event listed. •Be added to NB 100 FB messenger groups with AS volunteers for pre-event communications. However, not all HAM volunteers have FB. 	I actually had coverage of both repeaters at Grand Gap. I was able to monitor both with my HT Even. I had just enough signal on my cellphone to provide WiFi access for everyone. You couldn't get cellphone access just anywhere there, you had to be in the "magic" spot & only Verizon seemed to work at all. So that was a bonus I was able to do that.
				Wish I brought: small toolbox to include pliers, phillips and straight blade screwdrivers, 10mm socket, scissors, duct tape, small table.
				Name tags for volunteers in AS including communications volunteers.
				Additional supplies requested by runners at AS – duct tape, batteries, headlights for runners
				A formal Mission Statement – It is very easy to have scope creep, i.e. runners need duct tape-AS does not have, do we help? Do we help with set up and take down?
				Information from last year's crew that volunteered at AS.
				Alternate repeater should have been Morgan County, not simplex as simplex didn't work in all locations.
